About Me

I am a third-year B.Tech student specializing in Computer Science with Artificial Intelligence and Machine Learning at Chaitanya Bharathi Institute of Technology. I am passionate about software development, web development, and problem-solving. I enjoy building projects, learning new technologies, and continuously improving my programming skills.

Projects

Movie Recommendation System

Movie Recommendation System Technologies: Python, Flask, Machine Learning, scikit-learn, HTML/CSS, JavaScript
Developed a content-based movie recommendation system that suggests films based on user input. Utilizing cosine similarity and TF-IDF vectorization, the system analyzes movie descriptions to generate relevant recommendations.

Dungeons & Demons Game

Built a 2D adventure game using Python with multiple modules, player movement, enemies, collision detection, and animations.
